

WK01AS02 - Media Player

In this assignment, you're to use **only** HTML to create a simple media website(like YouTube) to play video and audio files. The trainee is expected to do the following:

- Create a minimum of 3 pages
- Each page should have a header which will be the title of the page
- Each page should have an input element, to represent a search field
- On the **first page**, create 2 images with links to a video page and an audio page
- On the **video page**, list at least 3 of your favorite videos with controls to play, pause, etc. Video size shouldn't be larger than 5MB
- On the **audio page**, list at least 3 of your favorite songs with controls to play, pause, etc. Audio size shouldn't be more than 2MB
